Solar Together

Solar Together Wiltshire

Buying solar panels
& storage made easy

Wiltshire Council

How does it work?

1- Registration

Register for free online by **09 August**. You will need an email address to register. There's no obligation and the more people that register, the better the deal for each household.

2- Auction

Approved solar installers will bid for the work in a reverse 'auction'. The most competitive offer from these pre-vetted installers wins the auction.

3- Personal recommendation

You will be emailed a personal recommendation based on your registration details. This includes your costs and the specifications of your installation.

4- You decide

The decision is then yours as to whether you want to accept your recommendation. There is no obligation to continue. You will have up to four weeks to decide.

5- Installation

If you accept, the winning installer will contact you to survey your roof and set an installation date. All installations are planned to be completed six months after accepting.

What our customers say!

I found the information available valuable and the customer webinar helpful.!

Ron, Salisbury
14 panels and battery storage installed

Easy and reassuring!

Ruth, Laverstock
14 panels and battery storage installed

How can solar panels benefit you?

Earn money from your unused solar power

If you don't use all the energy your panels generate, you can export it to the grid and earn money from it. This is called the Smart Export Guarantee (SEG).

Save money on your electricity bills

Solar panels are a good investment. With your own solar panels you can save on your energy bills and be less reliant on energy suppliers.

Renewable energy source

The sun is a clean and unlimited source of energy, unlike finite fossil fuels such as oil, gas and coal.

Reduce CO₂ emissions

With solar panels you contribute to the reduction of CO₂ emissions and a sustainable future.

Are you interested in battery storage?

Are you considering battery storage with your Solar Together installation?

Battery storage saves the unused energy that is generated by your solar panels, meaning you can use it whenever you want, instead of only during the day.

Battery storage can also reduce the electricity you use from the grid, and further cut your energy bills.

With Solar Together you will have the option to add battery storage to your installation when you receive your personal recommendation.

Do you already have solar panels installed?

Storage allows you to take control of your energy usage and become less dependent on electricity suppliers.

By maximising how much of your self-generated energy you can use at home, you can further reduce your carbon footprint.

What our customers say!

The site surveyor is knowledgeable and explained the options and installation proposal clearly. The installation team is highly professional, friendly and they are more than happy to explain the details of installation to the homeowner.

Yat, Melksham
8 panels and battery storage installed

The experience with the installation team was outstanding. They couldn't have been more helpful and professional. They made the whole installation stress free.
